

Sewer Rehabilitation

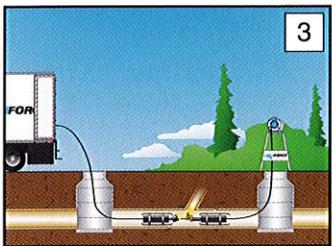

A Simplified Overview

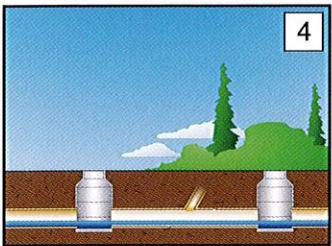

Using water pressure, a resin filled tube is inverted (turned inside out) through the entire length of the sewer to be rehabilitated

Hot water is circulated throughout the entire sewer to cure the resin filled liner.

Utilizing robotic cutters, all laterals are reinstated internally at which time service to each residence is restored.

Service to the entire section of sewer is restored.

Mission: LiquiForce provides municipalities with leading-edge no-dig solutions for their sewer and water rehabilitation challenges. Our team is driven to revitalize today's aging underground into tomorrow's environmentally sustainable infrastructure. For world class results... *Just Call The Force!*

ADVANCED NOTICE OF SEWER WORK

PLEASE READ

LiquiForce
No-Dig Pipeline Rehabilitation

As part of the on-going program to improve the sewer infrastructure, we have been contracted by your local government to rehabilitate the existing mainline sewers. The method of repair we intend to employ is called Trenchless Sewer Rehabilitation. This methodology eliminates the need for and the inconvenience associated with conventional open trench excavation.

We ask for your co-operation in advance to ensure this work is completed in a timely manner and within budget.

Your private sewer lateral connection will be **OUT OF SERVICE** for the time listed on the date(s) below, To reduce any inconvenience, we ask that you **MINIMIZE YOUR WATER USE** during these hours. In doing so we can eliminate the possibility of sewage backing up into your basement and/or plumbing.

Please DO NOT shower, bath, use dishwashers or washing machines during the hours noted below.

As well, keep toilet flushing to an ABSOLUTE MINIMUM.

Please note: prior to the crews arriving on your street, we ask each resident to pour 1 gallon of water into every floor drain, laundry tub, bath tub and shower drain in your basement to fill any dried out traps. This should prevent any odour from entering your home.

DATE AND TIME OF SEWER WORK

STREET: _____

DATE: _____

FROM: _____ UNTIL: _____

Please bear with us while we repair your sewers. Although we intend on making every effort to be mindful of your needs, we apologize for any equipment noise or inconvenience that may occur as a result of our work.

If any problems occur with your sewer service during this rehabilitation process, please visit one of our on-site representatives. If you have any questions after the completion of this project, please call.
